Evening Brief

Date: Tuesday August 6th, 2019

Weather Summary

***** High Risk for Lightning Wednesday and Thursday *****

*****High Risk for Wind on Friday *****

On Wednesday, thunderstorms will be much more widespread across the area as monsoonal moisture makes a northern push into the area. Of particular concern is the potential for dry lightning across southwest Idaho and central and northern Nevada. Further south and east on Wednesday, moisture will be deeper, and in those areas, most storms will be accompanied by wetting rain. However, central and Northern Nevada and southwest Idaho have a greater potential for dry thunderstorms and gusty/erratic outflow winds.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	3	Light-Moderate Initial Attack Activity
National	3	New Fires and Acres: 16 fires 29,555 acres; 11,129 acres large fire growth

Great Basin Fuels/Fire Potential

ERCs remain low across Utah, eastern NV and southeast ID in response to recent precipitation. Fire danger still remains elevated across Nevada and somewhat elevated across parts of western/southern Idaho where conditions have remained drier.

Monsoonal moisture will bring thunderstorms to much of the Great Basin midweek, with the greatest precipitation amounts across the southeastern part of the area.

Drier weather will impact the area this weekend.

Sagebrush live fuel moisture has been decreasing over the western half of the Great Basin and is near or below seasonal low values.

Resources:

Aviation within the Great Basin

- 1 VLAT's, 6 LATs, 2 CL-415
- 28 SEATs, 3 Fire Bosses
- 8 Type 1 Helicopters / 8 Committed
- 9 Type 2 Helicopters / 9 Committed
- 19 Type 3 Helicopters

Crews Committed within the Great Basin

- 21 IHCs Committed / 1 Available
- 34 T-2 IAs Committed / 0 Available
